Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Saturday 15 May 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Outbreaks of rain then showers, mainly for southern areas.

Today:
For southern areas cloudy start, then outbreaks of rain arriving. Showers, and some brighter spells, replace the rain this afternoon but the showers will become locally heavy and perhaps thundery. Further north mainly dry and cloudy, although some bright spells. Maximum temperature 13 deg C (55 deg F).

Tonight:
Becoming cloudy with showers or longer spells of rain, these sometimes heavy at first although mainly across southern areas. Hill fog is likely to form. Minimum temperature 8 deg C (46 deg F).

Sunday:
Early patchy light rain and hill fog will soon be replaced by bright or sunny spells and scattered showers, some of these heavy with a chance of hail and thunder. Maximum temperature 15 deg C (59 deg F).

Outlook for Monday to Wednesday:
Scattered showers or longer spells of rain each day, although some bright or sunny spells will occur. The showers sometimes heavy and thundery, especially for Monday. Temperatures slightly below average.
